Education

VIT Bhopal University, Bhopal GPA: 8.99 <i>Bachelor of Technology in Computer Science and Engineering Specialization in AI and ML</i>	October 2022 - Present
Standard Public School, Indore Percentage: 95% <i>12th (CBSE)</i>	2021 - 2022
Standard Public School, Indore Percentage: 91% <i>10th (CBSE)</i>	2019 - 2020

Technical Skills

Languages: Java, Python, SQL, JavaScript, HTML/CSS
Frameworks and Libraries: React, Node.js, MongoDB, PyTorch, TensorFlow, Pandas, NumPy, Matplotlib, OpenCV
Developer Tools: Git, GitHub, VS Code, Visual Studio, AWS(basics)

Projects

Plan-IT MongoDB, Express, ReactJs, NodeJs <ul style="list-style-type: none">Designed and developed a scalable cross-platform application using React Native, Node.js, and Firebase, supporting over 5,000 users across web and mobile platforms.Built 10+ interactive, real-time features including venue selection, live announcements, chat integration, and event media sharing to enhance attendee engagement.Integrated Firebase Authentication for secure user sign-in and Cloud Functions to enable seamless, real-time communication and backend processing.Optimized the front-end architecture for performance and responsiveness, ensuring a smooth user experience across devices and screen sizes.	January 2025
Credit Card Fraud Detection Python, PyTorch, Autoencoder <ul style="list-style-type: none">Cleaned and transformed transactional data using pandas and NumPy, eliminating 100% of null values and ensuring consistency for model training.Designed an Autoencoder-based deep learning model to identify fraudulent transactions within a dataset of over 400,000 financial records, effectively learning hidden patterns to distinguish anomalies from normal behavior..Achieved 97.99% training accuracy and 97.96% test accuracy in detecting fraudulent activities, demonstrating high model performance in an unsupervised learning setup.Implemented the solution in Python using PyTorch, optimizing an Autoencoder with a custom loss function to enhance fraud detection accuracy.	October 2024
Smart Attendance Python, MySQL, OpenCV, Tkinter, Numpy <ul style="list-style-type: none">Developed an AI-based attendance system using security cameras and face recognition to automate tracking for classrooms of up to 100 students.Achieved 90% face recognition accuracy by implementing Haar cascade classifiers with OpenCV and optimizing ML algorithms in Python.Integrated a MySQL database to manage attendance records for 1,000+ students, ensuring reliable and scalable data handling.Built a user-friendly GUI with Tkinter, enabling administrators to mark attendance in under 5 seconds per student.	July 2024

Certifications and Badges

- Completed **Salesforce Developer Certification Program** course from Ethnus.
- Earned **Salesforce Superbadge – Apex Specialist** from Salesforce Trailhead (April 2025). *View Credential*

Extracurriculars and Achievements

- Selected in top 100 students for **Reliance Undergraduate Scholarship** program.
- Selected in the top 0.56% (out of 2,00,000+ participants) in Adobe India Hackathon's coding round.
- Solved 400+ problems across platforms including LeetCode, GeekForGeeks, Codeforces, and more.
- Hobbies are Problem Solving, Gaming and Cricket.
